

SAFTE is designed to be as simple and unobtrusive as possible. The technology was developed to be user friendly, with minimal if any input from the resident.

SAFTE is your key to worry-free independent living. Stay safely in your own home and maintain an active lifestyle with the SAFTE system of total protection.

SAFTE offers peace of mind through a unique, affordable, easy-to-use method of monitoring as well as many ways to alert family, neighbors, caregivers, or emergency personnel if help is needed.

- Various sensors installed throughout the residence monitor movements.
- Lack-of-motion technology activates the communicator to call for help when you can't. You choose who receives the alert.
- State-of-the-art pendant, activated by wearer, sends signal up to 1000 feet—from the house, garden, or neighborhood — through walls and windows, even cement and steel.
- Simplified design technology.

*We call when you can't*

*Set it and forget it*
